Mrs. Graham, having determined to end her life because of grief over loss of her husband, wrote the letter carefully and deliberately. This is shown by the appearance of the letter, which was made public today. She used five sheets of tablet paper, and signed her name to each sheet, as if to insure every part of the letter against attack as to its genuineness. She wrote in a clear, regular hand, and told, in their order, the circumstances of the tragbeen "an unprovoked, premeditated

Another sensational Blouse event, typical of our determination to make this department the leader of its kind in all St. Louis. It is just sales of this kind that will accomplish our purpose and which will make stanch, firm friends.

How is it possible to offer such remarkable values so early in the season? Simply because this is the month of our "Boosting February" Sales and manufacturers are eager to respond to our offer of "cash" and are willing to sacrifice a good portion of their profits. Our policy of sharing our profits with our customers plus our "business building campaign" for this department answers the question above and this event answers the question of Blouse needs for months to some.

The assertion that it is based on force is not entirely without color, for even though there has been a partial agreement to limit naval armament, that very agreement provides that England shall have 558,000 tons of battleships of the first line, the United States 525,000, Japan 301,000 and France 320,600, not to mention the absence of lim-ltation of submarines or aircraft, or of the larger number of ships of the second line or auxiliary

WHAT those who serve us suffer is speedily forgotten. Not much was said during this week of what Lincoln suffered. How many of us ever think of what Mr. Wilson suffered? Here is what William Makepeace Thackeray said of Washington:

"What a constancy, what a magnanimity what a surprising persistence against fortune! Washington before the enemy was no better nor braver than hundreds that fought with him or against him. Who has not heard the repeated sneers against "Fabius" in which his factious Captains were accustomed to indulge? But Washington, the chief of a nation in arms, doing battle with districted parties; calm in the midst of conspiracy; serene against the open foe hefore him and the darker enemies at his back; Washington inspiring orders and spirit into troops, hungry and in rags; stung by ingratitude, but betraying no anger, and ever ready to forgive; in defeat invincible, magnanimous in conquest, and never so sublime as on that day when he laid down his victorious sword and sought his noble retirement-here indeed is a character to admire and revere; a life without

Written for the POST-DISPATCH By Clark McAdams

Our Solicitor-General does not like the growng Federal power in this union, and he views the future with alarm. He thinks no such powers as our central Government has a over the states were intended by the framers of the Constitution, and we are quite sure they, were not. What the men who devised the Constitution did not foresee was the weakness of the states. A prejudice naturally arose against the states, which were to be bought and sold, which were without high-minded leadership, and which got nowhere. This prejudice was

Solicitor-General, but the country had to get on. It is paying the penalty for that progress in buse of Federal power now gone to such lengths that we cannot hope to head it off. Mr. Beck thinks the taxing powers assumed by the Federal Government fairly threaten to devour us. As a matter of fact, a good many of us will sadly affirm that they have already done so.

States is somewhere in Indiana, but the sucker birth rate center is in North Missouri. North Missouri, one of the richest farming districts in the West, made millions when farm products were selling at war prices, and what did the people up there do with the money? At-torney-General Daugherty says they lead any other community in the country in suits for recovery of investments made in oil stocks and things like oil stocks. Altogether North Missourians are seeking to recover \$31,792,000. There is probably very little money in that part of Missouri now, as there is little in any farming country. Leaders of the farm organiza-tions think there ought to be more. So do the promoters of oil wells, etc. It is apparently no trouble to pick a North Missourian.

Sir: Socrates has it, sure enough. If soldiers are to demand economic equality with those who do not go to fight, then war is done for beyond question. The suggestion made by one of Socrates' pupils that soldiers may organize a union and demand the union scale conjures up an even more terrifying ghost when we think of soldiers claiming overtime. Obviously, we are not to get soldiers any more for nothing or little more than nothing. We have held life cheap, and, lo, it has put a better price upon itself. War has always been an absurdity. There has not been a sound thing in it from any point of view. How it has hung on through thousands of years mystifles one. While we are paying the bonus, it will do us good to look out of our pit of misery upon the Court of International Justice, which has managed to assemble at The Hague without any assistance upon our part and is ready to substitute international justice for war. We are only where we have elected to be -the rich man and Lazarus over again.

We are not arguing here for the truth of the theory. While almost all scientists caccept it in some form, there is still vigorous discussion as to its form of working, and the limits within which it can be taken as explaining important facts in nature. The only point w vish to make is that it is not a matter in which he Legislature can beneficially interfere. > TRAINING THE MIND TO THINK. From the Rochester Democrat and Chronicle P RESIDENT HIBBEN of Princeton University

speaks wisely when he calls for more education that creates thinkers, less that stuffs minds with facts which are not used for thinking. He says that education is not carrying grist to the mill; it is the building of the mill itself and the putting of it in condition to grind out real thought, independent thought to serve as motive to belief and action. In a way that is what our live school men are trying to accomplish, and it is not easy, for economy of time and money and the necessary uniform machinery of our schools work more readily at imparting facts than at imparting ability to think about the facts presented.
One great trouble with us is that we accumulate an immense amount of information from the many sources from which information comes without getting the ability to see each fact in its relation to other facts. Given a few facts and we have belief; given a grievance through contradiction of that belief and we have a group or a bloc. The rarest thing in the world is not knowledge, but ability to use it. There is no formula for wisdom; it must grow with the perience of an active mind. Dr. Hibben wants our education to produce active minds. In an effort to do this our school may have made periments because of which much criticism faddism has arisen. Possibly many of these edu-cational experiments have been futile of good results; when this has been true, they have been costly to the public. But people may well have patience with any effort that honestly seeks to so teach our children that they will think for themselves as a habit; and that furnishes them a mind trained to do this and a will to use that

Would Use Vessels to Be Scrapped Under Treaty for Continuance of Sea Structure at San Pedro.

VALIEJO, Cal., Feb. 16. - Recommendation that 12 of the battle-ships to be scrapped, in accordance with the agreements of the armament onference, be dismantled at Mare Island navy yard, then taken near Los Angeles and sunk as a continuance of the San Pedro breakwater. was made to the Navy Department today by Rear Admiral J. S. Mc-Kean commandant at Mare Island.

Admiral McKean proposed to take sufficient material from the vessels to pay for the scrapping cost, leav-ing enough machinery aboard each vessel to permit going to San Pedro under steam. The Admiral recommended that the battleship Mon-tana be among the vessels scrapped, and estimated that the scrapping would take about six months.

Gas in the Stomach A

Is Dangerous
Recommends Daily Use of Magnesia
to Overcome Trouble, Caused by Fermenting Food and Acid Indigestion.

Gas and wind in the stemach screen-panied by that full, bloated feeling after eating are almost certain evidence of the presence of excessive hydrothloris acid in the stomach, creating so-called "acid indigestion."

Acid stomachs are dangerous because too much acid irritates the delicate lining of the stomach, often leading to gastritic accompanied by serious stemach ulcers. Food ferments and sours creat-ing the distressing gas which distands the stemach and hampers the normal functions of the vital internal organa.

often affecting the heart.

It is the worst of felly to neglect such a serious condition or to treat with ordinary digestive aids which have no neutralizing effect on the stomach arids. Instead get from any druggist a few ounces of Bisurated Magnesia and take

Charles H. Apple, Whom Bischoff Accused of Imitating His Methods, in Landis' Court.

Ey the Associated Press. CHICAGO, Feb. 16.—Police were awaiting word from Palm Beach, Fla., today in their search for Leslie Harrington, missing head of one of the three concerns here, said to have defrauded foreign-born citizens of millions of dollars. A woman said by the police to be Harrington's wife is being kept under surveillance at raim Beach. Federal authorities think that Harrington is on the way to join her there today.

Harrington, who fled Chicago Sat-urday morning, following the expose of Raymond J. Bischoff's operations in which he is said by the police to have been indebted to the sum of \$4,500,000, has debts amounting to at least that figure, according to Federal investigators. Mrs. Harrington was not told that she was being watched, it was reported here, in the hope that some telegram or letter sent by her to Harrington might be intercepted.

While the State's Attorney's office esterday was investigating the affairs of Bischoff and Harrington a receiver was appointed by Federal Judge Landis for Charles H. Apple, whom Bischoff accused of imitating his methods in raising money. After the appointment of a receiver Apple appeared in court and declared that as his real place of residence was Kansas City the courts here had no

SEEKS NEW ALTITUDE RECORD

Flier Will Attempt to Better 40.800 Feet Mark Set Last September. By the Associated Press.

DAYTON, O., Feb. 16 .- In the face of expressions of doubt that a much greater altitude could be reached and declarations that the rarity of atmosphere at great heights probably would cause ruptures of the tissues of the human body, Lieut. J. A. MacReady today announced that he is planning to attempt to better the world's airplane altitude record of 40,800 feet which he es-

College football teams have no monopoly of "secret" practice. For the first time here the idea has gripped boxing devotees. An effort to view the workouts of John "Peewee" Kaiser and Al Walker, who will furnish the most interesting bantam battle of the present year at the Coliseum, next Tuesday, disclosed the fact that both boxers were thudding their souri Valley Conference leaders at sparring mates behind closed doors. Kaiser is working in an enclosed handball court at the Business Men's Gymnasium and Walker in a cellar 20. The victory was the twelfth in gymnasium on Chestnut street.

Walker's workouts may truly be said to be a "dark" secret. The gym is now operated for dusky boxers and all of Walker's sparring mates are negroes. A little whisper about ", ublicity" unlocked the doors of both hiding places and gave the writer a look-in at the most viciously fought workouts seen in this vicinity in a long time. before that I know of has the matter tere been thought of in national terms.

I think the development of the admission fee is a certainty for the future. And its almost sure coming makes apparent that we are living, right now, in the very midst of a changing era in the field of national sport. Golf is certainly becoming the great pastime of America—if indeed it has not already arrived. It is not with a prejudiced mind, I am sure, that I see this change coming over the country. The devotees of golf, the tremendous, almost phenomenal, spread of golf's popularity, the building of new courses everywhere—these things speak plainly enough of the changing order of the day. Golf is the virile, growing sport.

Some Apple Possibilities By Emilie Hoffman

AVE the perfect apples for eating raw or for baking. Considerable variety can be given to baked apples. Some cooks are of the opinion that apples have a better flavor when baked without removing the core, and they surely are delicious when simply sprinkled with sugar and baked in a pan containing a little water. Baste frequently and serve with whipped cream. Then, apples can be cored and placed in a asserole or baking dish and a mixture of syrup and water, flavored with cinnamon, poured over them, then covered and baked in the usual way. Another variation is to remove cores and fill the cavities with Su'tana raisins and finely chopped chestnuts that have been steamed. Serve these apples with whipped cream or a syrup sauce. Then, again, cavities can be filled with jam or with chopped dates. raisins and English walnuts.

adds a decided touch of chic.

NEW YORK .- Not only the uneven hem, but the unmatched sleeves play an important part in some of the new frocks here. One dancing frock seen at a recent evening affair was of the rosy-gold cornelian georgette over gold tissue. The left sleeve was wide and short, ending just above the elbow, and was orna-mented with lace dyed in the cornelian shade. The right sleeve has nothing at all on the shoulder except the mere fastening together of the front and back panels of the dress.

YOUTH in Southeastern Missouri became involved in legal proceedings as the result of the mysterious disappearance of a neighr's mare and the upshot was that a jury went so far as to find him guilty of horse-stealing and the Judge gave him a sentence of five years at hard labor. & friend of mine defended him at his trial.

Some months after his late client had been taken away to begin perving his sentence this friend of mine was sitting one morning in his office when the door opened and there entered the father of the youth,

"Hal," began the newcomer, "I come to see you to git you to do somethin' 'bout my boy Wesley Jr.'

"Well, Uncle Wes," said the lawyer, "I don't believe there is anything I can do. You remember how hard I worked for him at his trialhow I sweated down two or three collars over yonder in that courthouse and how I wasted all the oratory I had in my system and how I mapped both my suspenders. But in spite of all I could say, you know as well as I do what happened. The case went against us and the Judge gave Wesley five years in the State Penitentiary, and there he is."

"Yas, suh, Hal," said the father, "Wesley Jr. is up thar in that there penitentiary and that's jest the p'int! I got a letter frum him this mawnin'. And he told me to come to see you and to tell you to git him out of that place right-a-way—he's plumb dissatisfied." (Copyright, 1922.)
